

2.4G 11dBi Omni Directional Antenna

Model No. A011 KIT

A011KIT is a 2.4G high gain Omni-directional antenna which is designed to largely extend signal coverage and deliver better wireless performance for users.

It is mainly used in wireless Adapter and wireless Router/AP whose antenna is detachable. You can get stronger wireless signal simply by replacing your existing Wi-Fi antenna with A011.

Features

- Complies with IEEE 802.11n/g/b standards for 2.4GHz Wireless LAN.
- 11dBi high gain makes your signal coverage much wider.
- Provides RP-SMA female connector.
- Very easy to install, no configuration required.

Specifications

Antenna	
RF Frequency	- 2.4GHz
Impedance	- 50 Ohms
VSWR	- 1.92:1 (Max.)
Gain	- 11 ±1dBi
Polarization	- Linear, Vertical
Radiation	- Omni-directional
Connector Type	- RP-SMA
Application	- Indoor & Outdoor
Color	- White
Operation Temperature	- -10℃~60℃ (14 ℉~140 ℉)
Storage Temperature	- -10℃~70℃ (14 ℉~158 ℉)
