

HT-325, HT-325B Swivel Blade Stripper

With less force, easy and smooth operation

PATENT P.
TAIWAN
USA

Specification :

- Item no. : HT-325 & HT-325B
- Dimension : 150*48*23mm
- Function : Strip cables from 4.5~25 mm (.18" - 1.0") diameter
- Material: Body-ABS , Blade-SK5

Operation:

1. Turn the adjusting nut (A) to get the correct exposed length of blade for the cable and blade height.
2. Turn adjusting screw (B) to get the approximate cable diameter (not critical). This diameter is indicated on cable diameter guide (C)
3. Open the tool by pushing (D) upwards, and insert the cable between the blade and the V-shaped holder (E) and release.
4. Rotate the tool 2-3 times in a clockwise direction, to cut round the cable.
5. Swivel the blade by pushing the shaft, and pull the stripper along the cable, to make a longitudinal cut.
6. Use the sharp edge of the insulation lever (F) to lever insulation from conductor if necessary.

HT-	Blade holder
HT-325	Plastic
HT-325B	Metal
