# Team USB Drive Color Series | C155

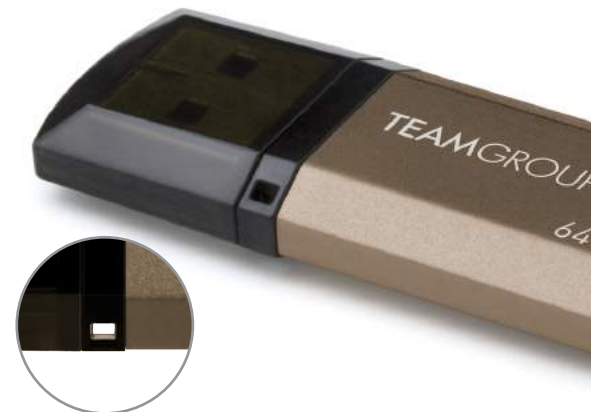

The Team C155 premium flash drive uses USB 3.0 high speed transfer interface which is 5 times faster than the data reading speed of USB 2.0 and this can significantly improve transfer performance. It is also compatible with USB 2.0 and USB 1.1 interfaces, and up to 128GB storage capacity that is able to satisfy the needs for High-Speed transmitting and storing of multimedia files and documents, allowing easier data sharing!

The body of the Team C155 is built with aluminum unibody case. The surface is abrasive blasted with features like anti-fingerprint and anti-corrosion anodization. It is an example of achieving aesthetic perfection through beautiful craftsmanship.

The exterior design of C155 is based on golden ratio to provide a chiseled shape. We also reduced the thickness to 7.1mm. The thinnest part at the outer edge is only 2.95mm thick which creates a thin but stereoscopic feel when consumers holding it in hand.

The strap hole design can go with a strap to perfectly match with user's personal belongings. It helps with avoiding the problem of losing the device, and it can also become a unique stylish accessory.

## Main Feature

- Strap hole design
- Supports hot-swap and plug-and-play
- Backward compatible USB 2.0/1.1 transmission interface
- No external power needed
- Support power saving mode
- The thinnest part at the outer edge is only 2.95mm thick
