[1] Part of the capacity of FLASH storage products will be used for formatting or other functions, and the displayed capacity in the operating system will be less than the actual storage capacity due to unit conversion. It is recommended to calculate the actual storage capacity based on this equation: total bytes/1024/1024/1024.

[2] The ATTO Disk Benchmark read and write speed test software is taken by TeamGroup as standard. Using different test software and computer may cause the test result slightly different.
